

## Zemkes Wolfpack Commemorative Revell Germany 1/72<sup>nd</sup> scale P-47M Bubbletop

**Model by Charles Scardon**

Built out of the box, SNJ metallic was applied over a basecoat of Testor's Gloss White. In fact, I used the Testor's small square bottle line. Often overlooked, there are many excellent colors available. The red for the cowl is #1103 (not an insignia red.) The blue rudder is a mix of #1110 Bright Blue and #1145 White.

I used 3 Guys Replica Decals for this subject. Markings are for the 56<sup>th</sup> FG commemorative P-47M parked near the Eifel Tower at the end of WW II. The aircraft named in honor of the 56<sup>th</sup>'s first Group commander, Hub Zemke- hence "Zemke's Wolfpack" proudly emblazoned on either side of the forward fuselage. It's worth noting 3 Guys Replica Decals was the only decal maker to publish these special markings. Long out of print but worth looking for!
